

# PROFILE

**ON AFRICA**  
CONSTRUCTION LTD

Bricks Production | Earth Moving Machinery Rental | Crusher | Batching Plant

# WHO WE ARE

ON AFRICA CONSTRUCTION LTD is based in Dodoma and Dar es Salaam (Tanzania), with the objective to serve large scale construction and earthmoving projects in Tanzania.

We strongly believe in teamwork, well – trained and motivated staff with the correct machinery and capacity, in building Tanzania.

# THE WORK WE DO

Activities such as brick production, concrete mixers and earth moving equipment hiring are our areas of expertise. Aggregate crushing, batching plants and the broader spectrum of the construction sector are what we are to strategically implement.

With our wealth of experience, modern equipment and skilled professionals we are able to deliver the highest standards in terms of quality, flexibility, productivity and safety, bringing each project to a fitting conclusion.

In addition, we have a wide range of machinery including wheel loaders, dump trucks, compactors and rollers at our disposal for long term rental to get your project done. Further on this brochure we will give you an overview of our projects and equipment.

Bricks - Self Loading and Offloading Truck

# CORE VALUES

## WHAT WE CARE ABOUT

As a reputable company we bear great responsibility for our people and the environment, meaning we dedicate ourselves to meeting the expectations of our clients, without compromising our excellent health and safety performance.

## WHAT'S OUR DRIVING FORCE?

Our stakeholders and society at large, to ensure mutual benefit as a result of our services.

We have set and constantly aim to improve our operating standards and as a result the service provided.

Key factors are having motivated employees and manager heading in the same direction.

# EQUIPMENT RENTAL

---

In need of earthmoving equipment? With a reasonable fleet of modern trucks, excavators, wheel loaders, compactors, mobile concrete mixer and crushers, ... we can answer your need.

At any time, we can increase our fleet of equipment to meet your operational goals. This flexible approach will not only improve your financial performance, it will also reduce delivery times and operational risks.

In combination with our expertise on logistics, we can provide our services on the most remote locations in the construction industries.
